Destapar información relevante con la red de citas de Web of Science

- Descubrir citas de cualquier trabajo (literatura, arte, etc.)
- Descubrir la clasificación de citas
- Explorar las referencias citadas enriquecidas
- *Recursos disponibles (Knowledge base)*

Destapar información relevante con la red de citas de Web of Science

- Descubrir citas de cualquier trabajo (literatura, arte, etc.)
- Descubrir la clasificación de citas
- Explorar las referencias citadas enriquecidas
- *Recursos disponibles (Knowledge base)*

Los beneficios de la indexación de citas

Vaya más allá de la búsqueda para encontrar documentos relevantes

- Referencias citadas: la investigación que cita un artículo
- Times Cited – artículos publicados más recientemente que citan el documento
- Registros relacionados: artículos que comparten al menos una referencia citada en común con el documento. Si comparten citas, es probable que estén discutiendo temas similares.

Rastree la investigación en el tiempo.

Related Records

Papers that cite some of the same research

References are useful:

- where keywords in the topic are not easy to define
- where older research needs to be traced
- when you need to see where a research trend leads

¿Por qué buscar referencias citadas?

Por ejemplo, para buscar citas a elementos que no están indexados en Web of Science Colección Principal

Buscar las citas a una patente

The Cited Reference in Web of Science can be used to search for Cited Patents too.

To do a Cited Reference Search for patents, enter the patent number in the Cited Title field. Do not specify a country code. For example, enter "5015744" to look up references to patent US5015744. This search will retrieve results for citations to patents from source items indexed in the database.

TIP – Search the patent numbers of a patent family with the operator OR to find the citations to an invention

- Explorar las referencias citadas enriquecidas
- *Recursos disponibles (Knowledge base)*

La clasificación de las citas en Web of Science

Clarivate evalúa la redacción exacta del autor en las frases que rodean la mención para comprender el contexto. Las menciones se clasifican de la siguiente manera:

- **Background** - previously published research that orients the current study within a scholarly area.
- **Basis** - references that report the data sets, methods, concepts and ideas that the author is using for her work directly or on which the author bases her work.
- **Discuss** - references mentioned because the current study is going into a more detailed discussion.
- **Support** - references which the current study reports to have similar results to. This may also refer to similarities in methodology or in some cases replication of results.
- **Differ** - references which the current study reports to have differing results to. This may also refer to differences in methodology or differences in sample sizes, affecting results.

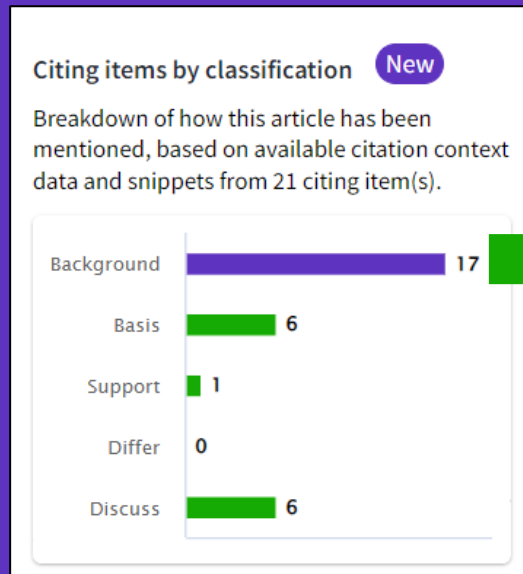

Using citation classification to know why an article has been cited

- Using the citation classifications that enrich cited references, you can see whether citing articles referenced a paper as background or basis, discussed it in more detail, or presented supporting or differing results.
- Citation classifications are available from recently published citing articles
- That is why the number of articles classified may be less than the total number of citing articles.
- Also, note that each item may mention this source article multiple times, and each mention is classified by the purpose of the citation

Use citation classification to know why an article has been cited

- When you click on the citing items assigned to a specific classification, you will see the citing articles and each in-text mention associated with the selected classification.
- Each in-text mention will include a brief extract of the author's exact words used when citing this source.

1 Endogenous Population Dynamics and Metropolitan Cycles: Long-Term Evidence from Athens, an Eternally Mediterranean City

Salvati, L

Jun 2022 (Early Access) | EUROPEAN JOURNAL OF POPULATION-REVUE EUROPEENNE DE DEMOGRAPHIE

77 References

Enriched Cited References

Natural population growth is an intrinsic property of demographic systems that depends on (spatially) non-stationary processes of fertility and mortality. Assuming distinctive demographic dynamics as a characteristic attribute of urban, suburban and rural systems, analysis of spatial variability in natural population growth delineates nonlinear stages of metropolitan expansion, possibly reflect ... Take the guided tour below the purple icon

- Aparece para documentos indexados a partir de 2021
- Hasta la fecha, los datos del contexto de citas están disponibles para artículos de más del 75% de las revistas en la Web of Science Core Collection, y esta cobertura continuará expandiéndose.

4 classifications

- La visualización conserva las conexiones lógicas del autor entre las referencias, ya que cada punto representa una mención en el texto de una referencia citada.
- La distancia entre puntos refleja la distancia en el cuerpo del artículo. Los puntos que están físicamente más cerca entre sí están más relacionados.

4 sections (expandable)

Sections hint at the author's intent (introduction = key paper, materials = how to structure experiment, etc.)
