The navigation menu is displayed on a dark background. At the top is the Clarivate logo. Below it is the 'Web of Science' logo with a search bar. The main menu items are: 'My Web of Science' with a left arrow, 'Marked List' with a folder icon and a '27' badge, 'History' with a circular arrow icon, 'Profile' with a person icon and an up arrow, 'My researcher profile' with a pencil icon and an 'EDIT' button (highlighted with a green box), 'My records' with a down arrow, and 'Profile notifications'.

The profile header shows a circular profile photo of Anne Delgado. To the right of the photo, the name 'Delgado, Anne' is displayed with a green checkmark, followed by 'Clarivate'. Below the name is the 'Web of Science ResearcherID: L-5046-2019' and a 'Share this profile' link. In the top right corner, there is a green-bordered box containing an 'Edit' button with a pencil icon.

The 'Profile Settings' section has three tabs: 'Edit Profile' (highlighted with a green box), 'Peer Review Preferences', and 'ORCID Syncing'.

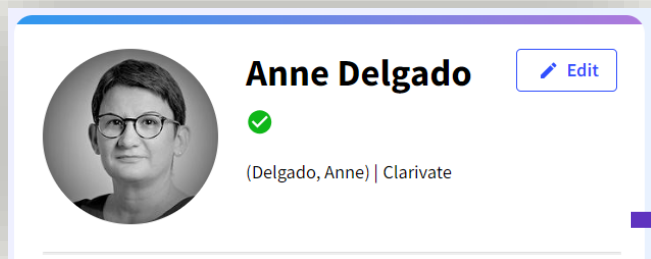

The 'Profile Settings' form is divided into several sections. The 'Profile Photo' section shows a photo of Anne Delgado, a 'SELECT FILE' button, and a 'Remove photo' link. The 'Display name' section has fields for 'First Name' (containing 'Anne') and 'Middle Name'. The 'Published names' section shows 'De Sousa Delgado, AD De Sousa Delgado, Anne-Paula' and a 'Display published names' toggle (checked). The 'Primary Organization' section has a text input field containing 'Clarivate' and a 'Remove organization' link. The 'Organization history' section shows '2008-2008 Centre National de la Recherche Scientifique (CNRS)' and a 'Display organization history' toggle (checked). At the bottom right, there are 'Cancel' and 'SAVE CHANGES' (highlighted with a green box) buttons.

**Abstract**  
DeminerIALIZED and disinfected waters may have very low microbial loads, requiring that large volumes of water are filtered to recover enough biomass for further analysis. Extended filtration periods, often interrupted by clogging, are a major limiting factor to concentrate samples' microbiota for further examination, besides hindering the work pace. In this study, we investigated the performance of three types of filtering membranes polycarbonate (PC), cellulose nitrate (CN), and polyethersulfone (PES) with 0.22 um pore size for culture-independent microbiological analysis (quantitative PCR of seven housekeeping and integrase genes) of tap water, recirculating tap water in a bottle washing loop, and of demineralized water. Compared to PC membranes, CN or PES required lower filtration periods, although had slightly lower DNA extraction yields.

**Merge Author Records** ✕

You can submit multiple author records as a single Author Profile with our three-step Author Record Correction Form:

- Begin by filling out our contact form so we can contact you once the merge process is complete.
- Then select publications that may not belong in the merged publications list. If you have no changes, skip this step.
- Review your merged record summary and submit for review

### Please note:

- Merging will not be allowed when two or more claimed profiles are selected. It is only allowed to merge one claimed profile with one or multiple unclaimed profiles at a time.
- When multiple profiles including a claimed profile are merged, we will take the claimed profile as primary and merge the other unclaimed profiles into it.
- All requests to merge profiles will be manually checked by our correction team

# Submit a request for merging profiles

At the bottom of the dialog, there are three buttons: "Cancel", "Save", and "Save & Close".

# ¿Cómo funciona?

- Las adiciones automáticas solo funcionan en perfiles que ya contienen al menos una publicación de Core Collection (el algoritmo de coincidencia se basa en los metadatos de estos artículos)
- Solo las publicaciones de Core Collection (y del índice de preprints) se agregan automáticamente a los perfiles reclamados y no reclamados
- Para los perfiles reclamados, las publicaciones agregadas automáticamente se consideran reclamaciones, no sugerencias (queremos ahorrar tiempo y trabajo a los usuarios sobre la base de que el algoritmo obtendrá en gran medida las adiciones correctas)
- Las adiciones automáticas a un perfil no son instantáneas (pueden pasar unos días antes de que un documento se agregue automáticamente a un perfil después de que se indexe)

# Se le informará por correo electrónico cuando se agreguen nuevas publicaciones a su perfil reclamado
