Los artículos falsos están contaminando la literatura científica mundial...

Fake papers are contaminating the world's scientific literature (The Conversation, January 2025)

Papers retracted from scholarly journals each year

The increase in retractions in 2023 is partly from a flood of more than 11,300 retractions over the past two years from top-five academic publisher Wiley, which shut down 19 compromised journals overseen by its Hindawi subsidiary. Retractions for 2024 are incomplete.

Papers published in 2022 that tripped the Papermill Alarm

When Adam Day ran his company's Papermill Alarm software on the 5.7 million papers published in 2022 in the OpenAlex database, he found a disturbing number of potentially fake papers – especially in biology, medicine, computer science, chemistry and materials science. The Papermill Alarm flags papers that contain textual similarities to known fakes.
