“What's in a name?”: author name disambiguation

Different authors share the same name
(polysemy)

2,916,611 results from Web of Science Core Collection for:

wang (Author)

What's in a Chinese name: scientists fight for identity when forced to use Latin alphabet

Chinese researchers seek ways to be distinguished in a world where their work is not published using their Mandarin name

Reading Time: 6 minutes

Why you can trust SCMP 

The same author may publish under different names
(synonymy)

Causes of authors' name synonymy:

- ✓ Different transliterations of non-English names
- ✓ Spelling errors
- ✓ Name changes and pen names
- ✓ Different versions of a personal name (full or abbreviated)

Buscar documentos con un nombre de autor

Information about Group Authors
(definition and indexing policy)

The screenshot shows the Web of Science search interface. At the top, there are two tabs: 'DOCUMENTS' (highlighted with a purple border) and 'RESEARCHERS'. Below the tabs, the search criteria are set to 'Search in: Web of Science Core Collection' and 'Editions: All'. A large purple box contains the text: 'A menudo es difícil recuperar las publicaciones de un autor buscando por nombre de autor (especialmente si hay varios autores con el mismo nombre e iniciales)'. The search form has an 'Author' dropdown menu with 'Author' selected. The search bar contains 'Example: O'Brian C* OR OBrian C*'. To the right of the search bar is a green circular button with 'A-Z'. Below the search bar, there are buttons for 'Clear' and 'Search'. On the left, a sidebar lists search fields: 'All Fields', 'Topic', 'Title', 'Author' (which is highlighted with a purple border), and 'Publication Titles'. A tooltip for the 'Author' field explains: 'Author Searches these fields: Authors and Group Author. For Authors, enter the last name first followed by a space and the author's initials.' It also provides an example: 'johnson m*'. The entire screenshot is framed by a purple border.

Hay una solución: ¡el identificador del autor!

1 Carbapenem-resistant bacteria over a wastewater treatment process: Carbapenem-resistant Enterobacteriaceae in untreated wastewater and intrinsically-resistant bacteria in final effluent
Araujo, S.; Sousa, M.; (...); Henriques, I.
Aug 15 2021 | Apr 2021 (Early Access) | SCIENCE OF THE TOTAL ENVIRONMENT 782
Although urban wastewater treatment plants (UWTPs) are important sites for antibiotic resistance elimination, their limitation in producing resistance-free effluents is recognized. Despite the critical importance of carbapenems to human health, the fate and diversity of carbapenem-resistant bacteria (CRB) in UWTPs is still poorly understood. We analysed CRB from different treatment stages in ... Show more
